NOIR® brain spatula

Coated brain spatula

Noir®- NO Irritation Reflections

AESCULAP®

NOIR® brain spatula

Virtually every cranial operation in neurosurgery requires a brain spatula. With their conical shape, the NOIR® spatulas provide a good view of the operating site, allow less extensive deep tissue retraction and hold the brain tissue securely aside. The black coating of the NOIR® brain spatulas gives them the advantage of effectively preventing irritating light reflections.

- NOIR® brain spatulas in four sizes: **S**, **M**, **L** and **XL**
- Conical taper
- Black NOIR® surface coating to avoid light reflections
- Smooth surface
- Flexible metal spatula
- Atraumatic rounded edges
- 200 mm long
- Easy to reprocess
- Reusable
