

Aesculap Aeos™ Robotic Digital Microscope

PPE Versatility

Surgeons have long relied upon and been tethered to the eyepieces of their traditional optical microscopes. The resulting ergonomic challenge is not new. However, this limitation may create additional burdens when presented with increased PPE requirements.

The revolutionary design of the Aesculap Aeos Robotic Digital Microscope allows surgeons to work comfortably without sacrificing precision and high-quality imaging.

PPE-Friendly Experience

Heads-up surgery design provides unrestricted and untethered positioning, freeing surgeons from traditional optical microscope oculars.

Positioning Flexibility

Entire OR shares the same high quality 3D 4K image on multiple monitors, increasing flexibility in personell room positioning.

Contact your Aesculap Neurosurgery Sales Representative to learn how the Aesculap Aeos Robotic Digital Microscope can change your surgical view.
